| 28 Zulip and other redirect endpoints -currently running in nginx on JS2 kubernetes-                   | 37 |
| 29 Bioconductor Helm Chart maintenance -for Kubernetes deployments-                                    | 38 |
| 30 Moving release to archive after official release                                                    | 39 |

# Welcome

**Package:** BiocHandoff **Authors:** Vincent Carey [aut, cre] **Compiled:** 2025-07-22 **Package version:** 0.98.1 **R version:** R version 4.5.1 (2025-06-13) **BioC version:** 3.22 **License:** MIT + file LICENSE

This is the landing page of the **BiocBook** entitled “BiocHandoff”.

This book introduces the reader to tasks required as staff members leave the organization.

We prefer a computable book to a static text or spreadsheet so that computations can be included and checked.

# Docker image

A Docker image built from this repository is available here:

[ghcr.io/vjcitn/biochandoff](https://ghcr.io/vjcitn/biochandoff)

## Get started now

You can get access to all the packages used in this book in < 1 minute, using this command in a terminal:

---

### Listing 0.1 bash

---

```
docker run -it ghcr.io/vjcitn/biochandoff:devel R
```

---

# RStudio Server

An RStudio Server instance can be initiated from the **Docker** image as follows:

---

**Listing 0.2** bash

---

```
docker run \  
  --volume <local_folder>:<destination_folder> \  
  -e PASSWORD=OHCA \  
  -p 8787:8787 \  
  ghcr.io/vjcitn/biochandoff:devel
```

---

The initiated RStudio Server instance will be available at <https://localhost:8787>.
